SHUBHAM SINGH RAJPUT

AI/ML Engineer Intern | Machine Learning | Python | Indore, India

+91-7000692301 | shubhambana700@gmail.com | Portfolio: shubhambana.github.io | LinkedIn | GitHub

CAREER OBJECTIVE

Computer Science student specializing in Artificial Intelligence and Machine Learning, with hands-on experience building and deploying machine learning projects in Python (Scikit-learn, SHAP, Streamlit, FastAPI). Completed two virtual internships in ML and AI. Seeking a remote AI/ML internship to apply data analysis and machine learning skills to real-world problems.

TECHNICAL SKILLS

Languages	Python, SQL
Data Analysis	NumPy, Pandas, Matplotlib, Seaborn, Excel, Power BI
AI / ML	Scikit-learn, data preprocessing, EDA, classification, regression, GridSearchCV, model evaluation, SHAP, NLP, Generative AI
Deployment	FastAPI, REST APIs, Streamlit, Docker
Tools	Git, GitHub, Jupyter / Google Colab

INTERNSHIP EXPERIENCE

Machine Learning Intern — CodeAlpha (Virtual) *Jul 2026 (1 Jul – 30 Jul)*

- Completed a one-month virtual Machine Learning internship (1 July - 30 July 2026) and received a Certificate of Completion (Student ID: CA/DF1/178342).
- Received a Letter of Recommendation from CodeAlpha noting analytical skills, quick adoption of new skills, and collaboration with fellow team members.
- Credentials are verifiable through the QR code on the certificate.

Artificial Intelligence Intern — DecodeLabs (Virtual) *Jun – Jul 2026 (27 Jun – 27 Jul)*

- Completed the one-month DecodeLabs Virtual Internship Program in Artificial Intelligence (27 June - 27 July 2026); Certificate of Completion issued 28 July 2026 (Student ID: AI074226).
- Certificate recognises hands-on problem-solving across real-world projects and collaborative tasks during the program.
- Received a Letter of Recommendation from DecodeLabs (29 July 2026); certificate is verifiable via QR code.

PROJECTS

Customer Churn Prediction System GitHub | Live Demo

- Built an end-to-end churn workflow on the IBM Telco dataset (7,043 customers, 26.5% churn): removed target-leaking columns (Churn Score, Churn Reason) and created a Scikit-learn pipeline for imputation, scaling and one-hot encoding.
- Compared 4 models and tuned the top 3 with GridSearchCV (5-fold CV); final tuned Random Forest reached F1-score 62.20%, recall 71.93% (up from 51.87% with balanced class weights) and ROC-AUC 85.09%.
- Added SHAP explanations and deployed a Streamlit app with a live SHAP waterfall plot, plus a FastAPI prediction endpoint and a Dockerfile.

Heart Disease Risk Prediction System GitHub | Live Demo

- Predicted heart disease risk from clinical parameters (age, chest pain type, blood pressure, cholesterol, max heart rate) using a Kaggle/UCI dataset.
- Performed data cleaning and EDA; compared Logistic Regression, SVM and Random Forest and selected Random Forest as the final model.
- Built a Streamlit app that returns a heart disease probability, plus a FastAPI /predict endpoint for external integrations.

EDUCATION

B.Tech, Computer Science Engineering (AI/ML) — Oriental University, Indore *2023 – 2027 | CGPA: 7.0*

CERTIFICATIONS

Google AI Essentials | Google Prompting Essentials | CodeAlpha Machine Learning Internship (Jul 2026) | DecodeLabs AI Virtual Internship (Jul 2026)
